

Phonics Cards

These phonics cards were designed to be used for teaching and drill purposes to support an existing phonics program with an established scope and sequence. For example, you can use the cards in conjunction with your school's reading series. The cards can be utilized during both whole and small group instruction to support the teaching of new phonics skills as well as review of previously taught skills.

These cards were specifically aligned with the assessment and scope and sequence found in the book School Success for Kids with Dyslexia and Other Reading Difficulties (Walter E. Dunson).

To assemble your cards, simply print the pages single-sided to double-sided on cardstock. It is recommended that you laminate the cards so that they are durable. Key words for the correct pronunciation of the phonics skill is provided for you on the back of each card.
