

Kindergarten

All students at our school are screened for reading difficulties three times a year using the Dynamic Indicators of Basic Early Literacy Skills (DIBELS) Next. This is one assessment that helps us identify students who may need extra help in learning the skills needed to become a strong reader. Your child's performance on this assessment follows:

| | Fall | Winter | Spring |
|------------------------------|------------|------------|------------|
| First Sound Fluency | _____ (10) | _____ (30) | |
| Letter Naming Fluency | _____ | _____ | _____ |
| Phoneme Segmentation Fluency | | _____ (20) | _____ (40) |
| Nonsense Word Fluency | | _____ (17) | _____ (28) |

The results of this assessment indicate:

Numbers in parentheses indicate expected performance

F W S

- Your child is on track to becoming a strong reader
 Your child may need some extra help with basic reading skills

Teacher Comments:

First Sound Fluency (FSF)

The understanding that words are made up of separate sounds is called “phonemic awareness.” Phonemic awareness is a critical skill in learning to read. The FSF subtest assesses your child’s ability to isolate the beginning sounds in words. Your child is given a word and asked to say the first sound in the word (“What is the first sound you hear in the word ‘man’?” Child “/m/”).

Letter Naming Fluency (LNF)

On the LNF assessment, your child is shown a page of random letters and asked to name the letters. The number of letters your child names correctly in one minute is counted. Although the ability to name letters is a strong predictor of later reading achievement, studies have demonstrated that it is possible for children to learn letter-sound correspondence without naming letters. Therefore, naming letters is not a powerful instructional target and benchmark goals are not provided.

Phoneme Segmentation Fluency (PSF)

Understanding that spoken words can be broken down into individual sounds and then blended back together to form a word is an important skill in learning to read and write. On the PSF assessment, your child is given a spoken word and asked to say each sound in the word (“Tell me the sounds in the word ‘mop’?” “Child: /m/ /o/ /p/”).

Nonsense Word Fluency (NWF)

Children with strong phonics skills know the sounds of letters and are able to blend them together to form words. On the NWF assessment, your child is shown a “nonsense word” containing 2 or 3 letters (e.g. bim, ob) and asked to read the word. Your child is given credit for each correct sound and added credit if he/she reads the word without saying each individual sound. Nonsense words are used so that the teacher knows your child is connecting the sound to the letter rather than recognizing the word by sight.

Core

An instructional recommendation of “core” means that the odds are in your child’s favor of achieving later reading goals with a continuing effective curriculum and instruction.

Strategic

An instructional recommendation of “strategic” means that the odds of achieving later reading goals are approximately 50% without added instructional support in addition to core reading instruction. If your child’s performance fell within this category, he/she will likely require intervention in addition to core reading instruction. Small group instruction targeting specific skills may be required. This intervention may be provided by your child’s classroom teacher and/or a reading specialist.

Intensive

An instructional recommendation of “intensive” means that your child’s odds of achieving later reading goals are approximately 10-20% without substantial intervention and support in addition to core reading instruction. Your child will require small group intensive intervention targeting specific skills. Your child is likely to receive small group intervention both in the classroom as well as with a reading specialist.

First Grade

All students at our school are screened for reading difficulties three times a year using the Dynamic Indicators of Basic Early Literacy Skills (DIBELS) Next. This is one assessment that helps us identify students who may need extra help in learning the skills needed to become a strong reader. Your child's performance on this assessment follows:

| | Fall | Winter | Spring |
|------------------------------------|-----------------------------------|---|---|
| Letter Naming Fluency | _____ | | |
| Nonsense Word Fluency | CLS: _____ (27) WWR: _____ (1) | CLS: _____ (43) WWR: _____ (8) | CLS: _____ (58) WWR: _____ (13) |
| DIBELS Oral Reading Fluency (DORF) | | WC: _____ (23) Accuracy: _____ (78%) | WC: _____ (47) Accuracy: _____ (90%) |

The results of this assessment indicate:

Numbers in parentheses indicate expected performance

F W S

- Your child is on track to becoming a strong reader
- Your child may need some extra help with basic reading skills

Teacher Comments:

Letter Naming Fluency (LNF)

On the LNF assessment, your child is shown a page of random letters and asked to name the letters. The number of letters your child names correctly in one minute is counted. Although the ability to name letters is a strong predictor of later reading achievement, studies have demonstrated that it is possible for children to learn letter-sound correspondence without naming letters. Therefore, naming letters is not a powerful instructional target and benchmark goals are not provided.

Nonsense Word Fluency (NWF)

Children with strong phonics skills know the sounds of letters and are able to blend them together to form words. On the NWF assessment, your child is shown a "nonsense word" containing 2 or 3 letters (e.g. bim, ob) and asked to read the word. Your child is given credit for each correct sound (Correct Letter Sound– CLS) and added credit if he/she reads the word without saying each individual sound (Whole Words Read– WWR). Nonsense words are used so that the teacher knows your child is connecting the sound to the letter rather than recognizing the word by sight.

DIBELS Oral Reading Fluency (DORF)

On the DORF assessment, your child will read three passages appropriate for his/her grade level for one minute and then may be asked to retell what was read. The teacher will calculate the words read correctly (Words Correct– WC) and your child's accuracy rate. The median words correct and accuracy rate will be used as your child's score on this assessment.

Core

An instructional recommendation of “core” means that the odds are in your child’s favor of achieving later reading goals with a continuing effective curriculum and instruction.

Strategic

An instructional recommendation of “strategic” means that the odds of achieving later reading goals are approximately 50% without added instructional support in addition to core reading instruction. If your child’s performance fell within this category, he/she will likely require intervention in addition to core reading instruction. Small group instruction targeting specific skills may be required. This intervention may be provided by your child’s classroom teacher and/or a reading specialist.

Intensive

An instructional recommendation of “intensive” means that your child’s odds of achieving later reading goals are approximately 10-20% without substantial intervention and support in addition to core reading instruction. Your child will require small group intensive intervention targeting specific skills. Your child is likely to receive small group intervention both in the classroom as well as with a reading specialist.

Second Grade

All students at our school are screened for reading difficulties three times a year using the Dynamic Indicators of Basic Early Literacy Skills (DIBELS) Next. This is one assessment that helps us identify students who may need extra help in learning the skills needed to become a strong reader. Your child's performance on this assessment follows:

| | Fall | Winter | Spring |
|------------------------------------|---|---|---|
| Nonsense Word Fluency | CLS: _____ (54) WWR: _____ (13) | | |
| DIBELS Oral Reading Fluency (DORF) | WC: _____ (52) Accuracy: _____ (90%) | WC: _____ (72) Accuracy: _____ (96%) | WC: _____ (87) Accuracy: _____ (97%) |

The results of this assessment indicate:

Numbers in parentheses indicate expected performance

F W S

- Your child is on track for achieving grade level reading benchmark standards
- Your child may need some extra help achieving grade level benchmark standards

Teacher Comments:

Nonsense Word Fluency (NWF)

Children with strong phonics skills know the sounds of letters and are able to blend them together to form words. On the NWF assessment, your child is shown a “nonsense word” containing 2 or 3 letters (e.g. bim, ob) and asked to read the word. Your child is given credit for each correct sound (Correct Letter Sound– CLS) and added credit if he/she simply reads the word without saying each individual sound (Whole Words Read– WWR). Nonsense words are used so that the teacher knows your child is connecting the sound to the letter rather than recognizing the word by sight.

DIBELS Oral Reading Fluency (DORF)

On the DORF assessment, your child will read three passages appropriate for his/her grade level for one minute and may then be asked to retell what was read. The teacher will calculate the words read correctly (Words Correct– WC) and your child's accuracy rate. The median words read correct and accuracy rate will be used as your child's score on this assessment.

The teacher will calculate the words read correctly (Words Correct– WC) and your child's accuracy rate. The median words read correct and accuracy rate will be used as your child's score on this assessment.

DAZE

The DAZE is a measure of your child's ability to understand what he/she reads. This assessment is typically administered to the whole class at the same time. Your child will be asked to silently read a grade level passage for 3 minutes. Every seventh word in the passage has been replaced by a box containing the correct word and two "distractor" words. Your child is required to circle the correct word that makes the most sense in the story. Credit is given for each correct answer.
